4-rolls wire feeder for shipyards

## MIG 41 W

The most compact industry wire feeder for 15 kg spools  
every dimension is smaller than 400 mm

MIG 41 W is mobile wire feeder, technically complete equipped, special for shipyards. Usable with all MIG/MAG-power sources, robust and easy to use.

**Technical data:**

**MIG 41 W**

- 4 rolls wire feed unit, wire speed 1-22 m/min
- wire diameters: Ø 0,8-1,6 mm
- welding current: 30-500 A

**Equipment:**

- powerful 4-rolls wire feed unit, roll diameters D. 37 mm, 2 pressure rolls
- full electronic control with:  
Soft start; Burn back;  
Wire inching; 2/4-stroke
- Geared potentiometers for fine adjustment of wire speed and welding voltage
- remote control for welding power source up to 100 m interconnection cable
- isolated body; robust construction
- standard wear and spare parts

**Variants:**

- a) with air cooling (article no. 11229-15)
- b) with liquid cooling (article no. 11229-16)

**Connection:**

- plug connectors:
  - welding current: Binzel 50/70 mm<sup>2</sup>
  - gas: 1/4"- tube attachment
  - control: Amphenol 7-pole connector
  - water: quick connectors

**Dimension:**

LxBxH 360x350x400 mm

**Weight:**

13 kg

**Possible connection to the following welding power sources:**

**Manufacturer:** WOLTERSDDORF; Kjellberg; Herrmann; ESAB; Kemp; Cloos; Jäckle; e.t.c.

producer:

**WOLTERSDDORF Schweißmaschinen GmbH, Eichendamm 3, D-15569 Woltersdorf**
